

### Wildlife Trails

Because the animals at the zoo reside in naturalistic habitats, they are sometimes not immediately visible. They might be napping in tall grass or behind a tree. The zoo is open year 'round and the animals' activities vary depending on the season. Remember, winter is one of the best seasons to see our animals!

### Conservation in Action

- Green infrastructure is soaking up rain water all around the zoo!
- Green roof on the Pachyderm Pavilion
  - Porous pavement in the courtyard and in the parking lot
  - Rain gardens at Primate Park and at the zoo entrance on Wilbur Ave.
  - Cisterns and rain barrels to reuse the rain throughout the zoo
  - Stormwater wetland at the waterfowl exhibits

### Please Respect the Animals

The animals in our zoo are wild and can be sensitive. You are a guest in their home, so please do not tap on the glass, throw anything into exhibits, cross barriers or make excessive noise.

The Rosamond Gifford Zoo is home to more than 700 animals. With **60% of exhibits indoors**, you can enjoy the zoo in all kinds of weather.

### Indoor Exhibits

**1 USS Antiquities**  
Our giant Pacific octopus exhibit greets you at the entrance of USS Antiquities. Several different species of fish, sea stars and anemones also live in the exhibit. Inside USS Antiquities discover the diversity of life from its earliest beginnings. Learn how fish, amphibians, reptiles, birds and mammals have changed over time.

**2 Diversity of Birds**  
The earth needs a variety of plants and animals to remain healthy. Explore biodiversity by discovering dozens of species of birds in our free-flight aviary.

**3 Adaptation of Animals: Nocturnal Animals**  
Animals have developed many wonderful adaptations to survive. Discover bats, mole rats, sloths and more.

**4 Social Building: Monkeys and More!**  
Visit the lions, meerkats, primates and fossa, and explore how living things relate to each other and to their environment.
