

Wildlife Trail

Because the animals at the zoo reside in naturalistic habitats, they are sometimes not immediately visible. They might be napping in tall grass or behind a tree. The zoo is open year 'round and the animals' activities vary depending on the season. Remember, winter is one of the best seasons to see our animals!

Please Respect the Animals

The animals in our zoo are wild and can be sensitive. You are a guest in their home, so please do not tap on the glass, throw anything into exhibits, cross barriers or make excessive noise.
